

Project Phase II – Guidelines for Students

1. Attendance & Reporting

- All students must report to the college every Friday without fail for project work, discussions, and progress evaluation.
- Attendance will be strictly monitored as part of internal assessment as per university guidelines.
- Students must be punctual and remain present for the full project hour schedule allotted for the day.
- Any absence must be informed and approved in advance with proper justification.

2. Progress Review & Documentation

- Students should maintain a Project Diary and update it weekly.
- Weekly progress must be presented to the guide during Friday review sessions.
- Each team must prepare and submit the Action Plan and Module Breakdown in the first two weeks.
- Students must maintain proper communication with the project guide and coordinator regularly through meetings, mails or official communication channels.
- Each group must prepare a survey paper for conference submission by December (Before Vacation)
- Students must prepare and finalize a full-length journal article for publication by the last week of February.

3. Work Discipline & Team Responsibilities

- Every student must actively contribute to their project; individual work distribution should be transparent.
- Each student should complete assigned tasks on time and be ready to demonstrate work during reviews.
- Proper communication and teamwork are expected; conflicts must be reported to the guide early.

4. Technical Requirements

- Code must follow good software engineering practices—modularity, documentation, version control.
- A running prototype must be ready by the mid-phase evaluation on 30.01.2025.

5. Review & Evaluation

- There will be formal internal reviews
 - Review 1: (6.01.25 & 9.01.25)
 - Mid-phase evaluation: (30.01.2025)
 - Review 2: (10.02.25 & 12.02.25)
 - Final Evaluation: (6.03.25 & 10.03.25)
- All team members must attend all reviews in formal dress with complete documentation.
- Marks will be based on understanding of the project, individual contribution, quality of implementation, documentation & presentation, and regularity including mandatory Friday attendance.

6. Documentation & Final Submission

- The final Project Report must follow the official formatting guidelines of the department.
- Plagiarism must be strictly avoided; similarity should be within permitted limits.
- Final submission includes: Report, Project Diary, Source Code, Presentation Slides, Installation/Deployment Instructions, and User Manual (if applicable).

7. Professional Conduct

- Students must behave responsibly within the campus and project lab.
- Mobile phone usage during project hours must be minimal and strictly limited to academic or project-related purposes, and only under the supervision or approval of the faculty in charge during that period.
- Students are expected to respect deadlines and maintain academic integrity at all times.
