

Reg No.: _____

Name: _____

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

Seventh Semester B.Tech Degree (R, S) Examination November 2024 (2019 Scheme)

Course Code: CXT401**Course Name: USER INTERFACE SOFTWARE AND TECHNOLOGY (UIST)****Max. Marks: 100****Duration: 3 Hours****PART A***Answer all questions, each carries 3 marks.*

Marks

- | | | |
|----|--|-----|
| 1 | Define the term instant gratification. | (3) |
| 2 | What are the advantages of bootstrap? | (3) |
| 3 | What is Information Architecture and Why Is It Important? | (3) |
| 4 | How do you create a basic card in Bootstrap? | (3) |
| 5 | What is the use of navigation bar in Bootstrap? | (3) |
| 6 | Describe the cost of navigation. | (3) |
| 7 | What are collapsible panels, and how do they contribute to effective UI design? | (3) |
| 8 | Explain the term accordions. | (3) |
| 9 | Explain the features and customization options for text areas in Bootstrap 5? | (3) |
| 10 | Identify and briefly describe three key best practices for designing interactive elements. | (3) |

PART B*Answer any one full question from each module, each carries 14 marks.***Module I**

- | | | |
|----|---|-----|
| 11 | a) Explain in detail about exploring user motivations and behaviour patterns. | (8) |
| | b) Explain in detail the different types of containers in Bootstrap 5 | (6) |

OR

- | | | |
|----|--|-----|
| 12 | a) Differentiate between habituation and streamlined repetition with an example. | (6) |
| | b) Define breakpoints and spacing utilities in Bootstrap 5 | (8) |

Module II

- | | | |
|----|---|-----|
| 13 | a) Describe the various classes available in Bootstrap 5 for handling images. How do these classes improve the presentation and responsiveness of images? | (6) |
|----|---|-----|

- b) Explain the various types of lists available in Bootstrap 5 and their use cases. (8)
How do classes like .list-group, .list-group-item, and .list-inline differ?

OR

- 14 a) Explain the effectiveness of the feature selection and browse pattern in organizing and presenting content within digital interfaces. (7)
b) Explain about news stream and its uses. (7)

Module III

- 15 a) Explain the importance of clear entry points in interface design. Provide two examples of interfaces that effectively utilize clear entry points. (8)
b) What is navigation and navigation design? What are the different ways to navigate? (6)

OR

- 16 a) Explain the structure and functionality of the Bootstrap 5 drop-down component. How do the classes interact to create a drop-down menu? (10)
b) Explain pagination in Bootstrap5 (4)

Module IV

- 17 a) Explain the concepts of diagonal balance and liquid layout in design. (7)
b) What is a grid of equals in design, and what are its advantages? Give examples (7)

OR

- 18 a) Discuss the basics of page layout and explain the principles of visual hierarchy and visual flow in page layout design. (14)

Module V

- 19 a) Discuss the role of action panels in modern UI design. How can action panels be used to improve workflow efficiency and user interaction? (7)
b) Describe the role of form-elements in Bootstrap 5. (7)

OR

- 20 a) Describe the purpose of the input groups in Bootstrap 5. (7)
b) Compare and contrast different types of buttons (e.g., primary, secondary, toggle, etc.) in terms of their function and design considerations. How do these different button types impact the overall user experience? (7)
